

PUBLIC UTILITY COMMISSION OF TEXAS

EARNINGS REPORT GENERAL INSTRUCTIONS

**Investor-Owned Transmission and Distribution Service Providers
In the Electric Reliability Council of Texas**

Effective January 1, 2013

TABLE OF CONTENTS

1.	General Instructions.....	2
2.	Instructions for General Questions and Schedules.....	3

GENERAL INSTRUCTIONS

1. This earnings report form is prescribed pursuant to Commission Substantive Rule 25.73(b) for investor-owned transmission & distribution service providers (IOU TDSPs) in the Electric Reliability Council of Texas (ERCOT). The objective of this report is to provide information needed to monitor IOU TDSPs' earnings levels and financial condition. Each TDSP required to file this earnings report shall submit its report to the Public Utility Commission of Texas (Commission) in the form and manner prescribed herein.

The reported information should reflect the 12-month period ending December 31. **The Earnings Report shall be filed not later than May 15 of the following year**, as specified in Substantive Rule 25.71(f)(4). Utilities unable to meet this filing deadline should contact the Commission's Director of Rate Regulation with as much advance notice as possible. The law allows penalties to be imposed in the event that the rules supported by the Public Utility Regulatory Act (PURA) are not followed.

2. Each IOU TDSP shall file with the Filing Clerk of Central Records at the Commission offices in Austin, Texas, three (3) copies of the printed Earnings Report (excluding instructions) and any attachments. Additionally, all utilities shall file an electronic version (i.e., in native Microsoft Excel format, with all cell references, formulas, links, and other electronic information intact) of the information contained in the required schedules and general questions. Any supporting attachments or workpapers filed as a PDF document shall be filed in searchable PDF format.

For Earnings Report filings that will be used to support an application under Subst. R. 25.243 (relating to Distribution Cost Recovery Factor (DCRF)), utilities shall *additionally* file all *supporting* schedules and spreadsheet workpapers in native Microsoft Excel format with all cell references, formulas, links, and other electronic information intact. Any supporting attachments or workpapers filed in PDF format should be searchable.

For specific instructions regarding the electronic filing of the report, please visit the Commission's website at: <http://www.puc.state.tx.us/industry/filings/FilingProceed.aspx>.

3. An IOU TDSP with a comprehensive base-rate proceeding pending before the Commission on the due date of the annual Earnings Report may defer filing its Earnings Report until 45 days after the Commission final order (or order on rehearing, if applicable) in the proceeding, and in such case may file an abbreviated report consisting of the following schedules:

- General Questions
- Schedule I (including Schedule Ia)
- Schedule III
- Schedule IV (not Schedule IVa)
- Schedule V
- Schedule IX
- Signature Page

4. Unless otherwise indicated, the information required in this report form shall be taken from the accounts and other records contained in the Federal Energy Regulatory Commission (FERC) chart of accounts. The definitions and instructions contained therein shall also apply to this report wherever applicable.
5. If FERC Form 1 reports are available for the reporting period, they shall be relied upon for purposes of preparing this report.
6. In preparing the report, all instructions should be followed and each question should be answered fully and accurately. The expression "none" or "not applicable" shall be given as the answer to any particular inquiry only where the expression truly and completely states the fact. Where a numeric response is required, insert the numeric value "0" as appropriate. All dollar amounts provided in response to questions or schedules should be rounded to the nearest dollar.

7. References to reports of previous periods or to other reports will not be accepted in lieu of information requested in this report. This report does not replace any other report required by the Commission unless substitution is specifically allowed by the Commission's Substantive Rules.
8. In accordance with Substantive Rule 25.71(d), all reports submitted to the Commission shall be attested to by an officer or manager of the TDSP under whose direction the report is prepared, or if under trust or receivership, by the receiver or a duly authorized person.
9. Any IOU TDSP filing supplemental attachments to its earnings report shall place those items after the schedules and attestation page. Neither the General Instructions to this earnings report nor the instructions for specific schedules should be filed. Each copy of the earnings report shall be organized in the following order: (1) cover sheet; (2) general questions; (3) required schedules (including required supplemental schedules); (4) signature page; and (5) supplemental attachments (if any).
10. Schedules for the printed copies of the report and responses to the general questions can be printed using the Excel spreadsheet file. The Excel file containing the earnings report schedules contains print macros to simplify the printing process.
11. If any schedule requires revision after the initial filing of the report, the utility shall file a revised report (including an electronic version in Microsoft Excel format with all cell references, formulas, links, and other electronic information intact) containing all schedules. The report should be labeled "Revised" and include the date of revision. General Question No. 10 shall be completed for all revised reports.

INSTRUCTIONS FOR GENERAL QUESTIONS AND SCHEDULES

General Questions

Please provide the requested information.

Schedule I: Summary of Revenues and Expenses

Column 1 of this schedule shall reflect information as reported on the IOU TDSP's financial statements and/or FERC Form 1, as applicable.

All interest expenses other than interest on customer deposits should be excluded from Schedule I.

The revenue portion (lines 1 through 6) of this schedule should reflect all revenue received by the company, including revenue for any charges that are recovered "separately" (i.e., through a separate rider) by the company. Such revenues may include, but are not limited to, revenue received for nuclear decommissioning expenses, transmission cost recovery factors, competition transition charges, municipal franchise fees, and the system benefit fund. Additional explanatory information on any company-specific reporting treatments should be provided on Supplemental Schedule IV or additional workpapers.

For Schedules I through IV, the allocation percentage in column 4 (column 2 in Schedule IV) is calculated by dividing each Texas Jurisdictional item by the corresponding total electric item. This calculation is performed automatically by the spreadsheet.

Columns 1-8 for operations and maintenance expenses (line 11) are carried forward from Schedule II.

For **column 6**, in the "Total Revenues" section (the upper portion), no percentage inputs are required. Rather, companies should report revenue receipts for wholesale transmission in **column 7**, in the "Total Revenues" section, by directly inputting the appropriate dollar-amounts. For these inputs in the revenue portion of **column 7**, companies should include the payments received from others for wholesale transmission service per the commission's wholesale transmission matrix (include any incremental amounts approved by the commission after the matrix was finalized). Companies should also include in this portion

of column 7 other revenues properly functionalized as wholesale transmission revenues, and include in Supplemental Schedule IV a detailed description of the specific amounts and nature of such revenues. The remaining expense (bottom) portion of **column 7** is automatically calculated by the spreadsheet (based on the percentage inputs to the bottom portion of column 6 as described below).

For **column 6**, in the “Expenses” section (the lower portion), companies should enter for the various line items the “Wholesale Transmission Percentage” as calculated using their most recently available information based on direct assignment of costs.

Column 8 is automatically calculated by the spreadsheet, and should reflect retail T&D revenues and expenses.

Column 8 of line 2 should correspond to Schedule X.1a, line 13, column 7.

Amortization expense (line 12) is the sum of all items entered on Supplemental Schedule I-1 "Amortization Expense."

Nonbypassable (NBP) charges are carried automatically from Schedule Ia, line 17, and reflect only the amount of NBP charges included in the utility’s “base” T&D revenue requirement (i.e., the amounts that are not recovered through a separate rider).

Columns 3-5 for federal income taxes (line 17) are carried forward from Schedule IV. Column 1, line 17 must be manually input on Schedule I. It should be the amount reported on the TDSP's financial statements.

Deferred expenses (line 18) are the total deferred expenses associated with a deferred accounting order and/or a rate moderation plan approved by a regulatory authority. Deferred expenses recognized during the monitoring period, but associated with prior periods, should be excluded. Please identify any excluded deferred expenses on a separate attachment.

Other expenses (line 20) is the sum of all items entered on Supplemental Schedule I-2 "Other Expenses."

Schedule Ia: Summary of Other Nonbypassable Charges

Provide the requested information regarding the utility’s nonbypassable charges.

Lines 14 through 16 should include any amounts of nonbypassable charges recovered as part of the utility’s “base” T&D revenue requirement (i.e., not recovered through a separate rider). The amount of line 17 will be carried automatically to Schedule I, line 19.

Schedule II: Operations and Maintenance Expense

This schedule details the amount of operations and maintenance expense shown on Schedule I. Note that line 8 should reflect wholesale transmission matrix payments made to other transmission providers.

Column 1 of this schedule should reflect information as reported on the TDSP's financial statements.

Column 6 should use the same inputs calculated per the above instructions for Schedule I for the “Expenses” portion of that schedule’s column 6.

Columns 7 and 8 are automatically calculated by the spreadsheet.

Schedule III: Invested Capital at End of Reporting Period

This schedule details the invested capital as of the end of the reporting period.

Column 1 of this schedule should reflect information as reported on the TDSP's financial statements.

Please enter reductions to invested capital as negative amounts on this schedule and the related supplemental schedules.

No items that have been specifically disallowed by the Commission should be included in columns 3 or 5 of this schedule.

Column 6 should use the same inputs calculated per the above instructions for Schedule I for the "Expenses" portion of that schedule's column 6.

Columns 7 and 8 are automatically calculated by the spreadsheet, except for lines 22 and 23.

Working cash allowance (line 7) should be the amount of working cash allowance granted in the TDSP's last rate case as of the end of the reporting period. If the TDSP has not had a final order issued in a rate case within the last five years, please enter negative one-eighth (1/8) of total operations and maintenance expenses (line 12) from Schedule II in the appropriate columns of this line item.

Other invested capital additions (line 10) is the sum of all items entered on Supplemental Schedule III-1 "Other Invested Capital Additions."

Deferred Federal Income Taxes (line 11) should exclude the effect of Financial Accounting Standards Board Interpretation No. 48.

Other invested capital deductions (line 17) is the sum of all items entered on Supplemental Schedule III-2 "Other Invested Capital Deductions."

The rate of return measure (line 28) expresses return from Schedule I as a percentage of total ending invested capital (excluding CWIP not allowed in rate base and accrued AFUDC). Ending balances for CWIP in rate base and accrued AFUDC are to be input manually on this schedule.

The Earned Return on Ending Equity measure calculates automatically using data from Schedules I, II, III, IV and V.

The weather-adjusted rate of return and return on equity are calculated automatically using data from Schedules I, II, III, IV, V, and X.1a,b,c.

Schedule IV: Federal Income Taxes

This schedule calculates federal income taxes (FIT) using Tax Method 2. The resulting FIT reflects current tax effects (at 35%) of book transactions adjusted for timing differences and permanent differences, and reflects deferred taxes (at 35%). Additionally, the FIT reflects the effects of timing differences previously flowed through (at 35%), amortization of investment tax credits, and amortization of excess deferred taxes using the average rate assumption method (ARAM). The resulting FIT is not intended to tie to the FIT amount per the books of the TDSP.

Schedule IV should not reflect the effects of any disallowed or nonregulated plant, or any nonregulated operations. Schedule IV should not reflect the effects of any net operating loss carryforward or carryback.

Schedule IV should not reflect the operations of any affiliates or subsidiaries; it should reflect only TDSP operations.

Please note that lines 1 - 11 are automatically taken from Schedule I on the spreadsheet.

Interest included in return (line 12) is calculated using the formula: weighted cost of debt * TOTAL INVESTED CAPITAL—ADJUSTED on Schedule III (line 25).

The depreciation addback - permanent differences on Line 14 should be the same adjustment that is made to return in Tax Method 1 for permanent differences. This adjustment is not to reflect normalized or non-normalized timing differences.

The tax effect of non-normalized timing differences (at 35%) should be reflected on Line 32, and is the same adjustment that is made to return in Tax Method 1 for timing differences previously flowed through, but here the adjustment is multiplied by the tax rate of 35%.

The additional tax depreciation on Line 20 results from timing differences related to depreciation, or the excess of tax depreciation over the book depreciation claimed on Schedule I for all plant reflected in Schedule III. This amount should be adjusted to remove the effects of the permanent differences on Line 14.

All normalized timing differences other than those related to depreciation should be reflected on Line 21. For purposes of this schedule, all non-normalized timing differences should be reported with permanent differences on Line 19.

The current provision for deferred taxes on Line 31 is calculated automatically using the formula: (additional tax depreciation [Line 20] + other timing differences [Line 21]) * 35%.

Reflect the amortization of excess deferred taxes using the amount booked during the monitoring period.

Schedule IVa: Consolidated Tax Savings

For item A, all regulated entities that are a part of the consolidated group should be listed by name. For purposes of this schedule, the term “regulated” applies to companies whose services or products provided to its customers are established by or are subject to approval by an independent, third-party regulator. All non-regulated affiliate companies with net taxable income shall be aggregated for reporting purposes, and all non-regulated affiliate companies with net taxable losses shall be aggregated as well.

Only numerical responses are to be included in the "Net Taxable Income or Loss" and “AMTI” column. Narrative answers such as "GAIN" or "LOSS" are not acceptable.

For items B - E, provide the requested information on the bottom portion of the schedule. If additional space is required, please attach additional sheets detailing the appropriate responses.

The amounts reported on Schedule IVa should reflect the effect of intercompany eliminations, but should not reflect the effect of any allocations between affiliates of tax effects of consolidation.

Schedule IVb: Consolidated Tax Savings - Continued

This schedule should be filled out only by those utilities requiring additional space on Schedule IVa.

Schedule V: Weighted Average Cost of Capital

Please provide the capital structure and weighted average cost of capital of the TDSP as of the end of the monitoring period. It is not necessary to estimate the current cost of equity; for purposes of this filing you should use the TDSP's current authorized return on equity in Texas. The costs and balances of preferred stock, long-term debt, and short-term debt (if included in the company's WACC) should correspond with those provided in response to Schedules VIa, VIIa, and VIII.

Schedule VI: Weighted Average Cost of Preferred Stock

Please provide the weighted average cost of preferred stock capital based upon the following data for each class and series of preferred stock outstanding according to the balance sheet as of the end of the monitoring period. For each issue, please include:

- a. Description.

- b. Date of Issuance.
- c. Redemption Status (indicate whether or not mandatory redemptions are required).
- d. Annual Dividend Rate (in percent).
- e. Par Value at Issuance.
- f. Premium or (Discount) at Issuance.
- g. Underwriting Fees and Issuance Expenses.
- h. Gain or (Loss) on Redeemed Stock at Issuance.
- i. Original Net Proceeds [column (e) + column (f) - column (g) + column (h)].
- j. Net Proceeds as a Percent of Par Value [column (i) / column (e)].
- k. Par Value Currently Outstanding.
- l. Current Net Proceeds [column (k) x column (j)].
- m. Issue as a Percent of Total Net Proceeds. Each issue should be weighted by the current net proceeds to derive the weighted cost of preferred stock.
- n. Cost of Money (this will equal the stated dividend rate only if there were no issuance expenses or underwriting costs, discounts or premiums, or gains or losses on redeemed stock):
 - Dividend rate divided by net proceeds as a percent of par value [column (d) / column (j)].
 - For fixed-rate issues with mandatory redemption, the cost of money may be calculated using the yield-to-maturity method.
- o. Weighted Cost of Preferred Stock [column (m) x column (n)]. The Weighted Average Cost of Preferred Stock is calculated by summing the data in column (o) for each issue.

Schedule VIa: Adjusted Cost of Preferred Stock

This schedule adjusts the weighted average cost of preferred stock (from Schedule VI) in order to reflect the amortization of gains or losses on redeemed stock that was not associated with a specific refunding issue of preferred stock. Data input is required on lines 3, 10, and 12 for any company reporting an unamortized balance of gains or losses on redeemed stock (reference line 1 of Schedule VIa). If such gains or losses are not amortized, or if all of the gains or losses on redeemed stock are already accounted for in column (h) of Schedule VI, then the value to be input on line 3 should equal the value appearing on line 1, and the value "zero" should be input on lines 10 and 12. The adjusted cost of preferred stock calculated on line 32 should then be carried forward to Schedule V for purposes of calculating the weighted average cost of capital.

Schedule VII: Weighted Average Cost of Long-Term Debt

Please provide the weighted average cost of long-term debt capital based on the following data for each class and series of long-term debt outstanding according to the balance sheet as of the end of the monitoring period. For capital lease obligations, the cost and balance of debt should be determined in accordance with generally accepted accounting principles. For each debt issue, please include:

- a. Description
- b. Date of Issuance
- c. Maturity Date
- d. Interest Rate (Effective interest rate should be used for issues supported by letters of credit.)
- e. Principal Amount at Issuance
- f. Premium or (Discount) at Issuance
- g. Underwriting Fees and Issuance Expenses
- h. Gain or (Loss) on Reacquired Debt at Issuance
- i. Original Net Proceeds [column (e) + column (f) - column (g) + column (h)]
- j. Net Proceeds as a Percent of Par Value [column (i) / column (e)]
- k. Principal Currently Outstanding (including current maturities)
- l. Current Net Proceeds [column (k) x column (j)]
- m. Issue as a Percent of Total Net Proceeds. Each issue should be weighted by current net proceeds to derive the weighted cost of debt.
- n. Cost of Debt (this will equal the stated interest rate only if there were no issuance expenses or underwriting costs, discounts or premiums, or gains or losses on reacquired debt):

For variable rate issues, the cost of debt shall reflect the interest rate defined as the average interest rate paid (interest paid in the prior period divided by average principal outstanding) divided by net proceeds as a percent of par value [column (d)/column (j)].

For fixed-rate issues, the cost of debt should reflect the yield-to-maturity based on the interest rate, net proceeds, issuance date and maturity schedule, determined by reference to any generally accepted table of bond yields, or a calculator with appropriate capability.

- o. Weighted Cost of Long-Term Debt [column (m) x column (n)]. The Weighted Average Cost of Long-Term Debt is calculated by summing the data in column (o) for each issue.

Schedule VIIa: Adjusted Cost of Long-Term Debt

This schedule adjusts the weighted average cost of long-term debt (from Schedule VII) in order to reflect the amortization of gains or losses on reacquired debt which was not associated with a specific refunding issue of debt. Data input is required on lines 3, 10, and 12 for any company reporting an unamortized balance of gains or losses on reacquired debt (reference line 1 of Schedule VIIa). If such gains or losses are not amortized, or if all of the gains or losses on reacquired debt are already accounted for in column (h) of Schedule VII, then the value to be input on line 3 should equal the value appearing on line 1, and the value "zero" should be input on lines 10 and 12. The adjusted cost of long-term debt calculated on line 32 should then be carried forward to Schedule V for purposes of calculating the weighted average cost of capital.

Schedule VIII: Weighted Average Cost of Short-Term Debt

Please provide the historical balances, as available, of short-term debt and a calculation of the weighted average cost of short-term debt as of the end of the monitoring period. The balance and weighted average cost of short-term debt may be carried forward to Schedule V for purposes of calculating the weighted average cost of capital if the TDSP believes it is appropriate. This schedule should not include current maturities of long-term debt.

Schedule IX: Historical Financial Statistics

Please provide a schedule with the following ratios for the monitoring period and the four preceding fiscal years calculated on a total company basis. The data used to calculate these ratios should be taken from the Company's audited financial statements, if available for the periods requested.

(1) Total Debt as a Percent of Total Capital

Numerator:		Notes Payable
	+	Long-Term Debt (Incl. Current Maturities & Capital Lease Oblig.)
Denominator:		Notes Payable
	+	Long-Term Debt (Incl. Current Maturities & Capital Lease Oblig.)
	+	Preferred Stock
	+	Preferred Trust Securities
	+	Common Equity

(2) Total CWIP as a Percent of Net Plant

Numerator:		Total Construction Work In Progress
Denominator:		Total TDSP Plant
	-	Accumulated Depreciation and Amortization

(3) Construction Expenditures as a Percent of Average Total Capital

Numerator:		Cash Construction Expenditures [See Note 1]
Denominator:		Average of Beginning and Ending Balance of Total Capital (See Definition of Total Capital Provided for Ratio No. 1)

(4) Pre-Tax Interest Coverage

Numerator:		Income from Continuing Operations
	+/-	Nonrecurring Items (Before Tax)
	-	Equity AFUDC
	+	Income Taxes
	+	Interest Incurred [See Note 2 below]
Denominator:		Interest Incurred

(5) Funds From Operations / Total Debt

Numerator:		Cash Flow from Operations (Before Working Capital Changes) [See Note 3 below]
	-	AFUDC (both debt and equity portions)
	-	
Denominator:		Notes Payable
	+	Long-Term Debt (Incl. Current Maturities & Capital Lease Oblig.)

(6) Fixed Charge Coverage

Numerator: Same as (4)
+ 1/3 of Rental Expenses

Denominator: Interest Incurred
+ 1/3 of Rental Expenses

(7) Fixed Charge Coverage Ratio (Including Distributions on Preferred Trust Securities)

Numerator: Same as (4)
+ 1/3 of Rental Expenses
+ Distributions related to Preferred Trust Securities

Denominator: Interest Incurred
+ 1/3 of Rental Expenses
+ Distributions related to Preferred Trust Securities

(8) Funds From Operations Interest Coverage

Numerator: Same as (5)
+ Cash Interest Paid

Denominator: Interest Incurred

(9) Net Cash Flow/Capital Outlays

Numerator: Same as (5)
- Preferred Dividends
- Common Dividends

Denominator: Cash Construction Expenditures [See Note 1 below]

(10) Cash Coverage of Common Dividends

Numerator: Same as (5)
- Preferred Dividends

Denominator: Common Dividends

(11) AFUDC as a Percentage of Net Income for Common Shareholders

Numerator: Total AFUDC [See Note 4 below]
+ Deferred Carrying Costs [See Note 5 below]

Denominator: Net Income after Preferred Dividends

(12) Return on Average Common Equity

Numerator: Net Income After Preferred Dividends

Denominator: Average of Beginning and Ending Common Equity

NOTES

- (1) "Cash Construction Expenditures" should not include any AFUDC or Capitalized Interest.

- (2) "Interest Incurred" includes all Interest Charges, and excludes any recognition of ABFUDC, Deferred Borrowing Costs, Capitalized Interest, and Distributions related to Preferred Trust Securities.
- (3) "Cash Flow from Operations" should reflect the amount reported in the Statement of Cash Flows, less ABFUDC and Capitalized Interest (if not already subtracted from Net Income in the Statement of Cash Flows), and should also reflect distributions related to Preferred Trust Securities.
- (4) "Total AFUDC" includes both the Allowance For Borrowed Funds Used During Construction (ABFUDC) and the Allowance For Equity Funds Used During Construction (AEFUDC). Actual reported AFUDC should not be adjusted for related tax effects.
- (5) "Deferred Carrying Costs" include any borrowing costs or equity return deferred under an accounting order or qualified phase-in plan.

Schedule X: Revenue, Sales, and Customer Data

Complete the entire set of schedules (Schedules X.1 through X.6) even if you make no adjustment to revenue. Revenue and sales adjustments should be made on an as-needed basis to reflect significant changes in sales due to abnormal weather.

If you have no adjustment to revenue to account for weather abnormalities, carry over the unadjusted values in Schedules X.1a and X.2a to Schedules X.1b and X.2b (so that the adjustment figures in X.1c and X.2c result in zeroes). Then, in Schedule X.5, explain *why* you have not made any weather-adjustment (i.e., why your adjustments are zeroes).

In Schedule X.3, use a 65° base following the National Oceanic and Atmospheric Administration's definition of Cooling Degree Day (CDD) and Heating Degree Day (HDD). If your CDDs and HDDs are collected from more than one weather station, provide weighted average figures for the whole Texas service area. Then, if the weather measures that you have used for weather-adjustment are different from what you have provided in Schedule X.3, incorporate those in Schedule X.5 where you explain your weather adjustment method.

The development of data in these schedules should reflect the requirements of PUC Subst. R. 25.243(b)(5). For earnings-report filings that will be used to support an application under Subst. R. 25.243, the utility should include in the filing the statistical tests from the models underlying the weather-adjusted data.

Schedule XI: Adjustments (Optional)

If the TDSP believes that material adjustments to any of the information provided in the report would be appropriate, please provide the details, including an explanation. Adjustments to Schedules I-IV should be presented on a total electric and a jurisdictional basis. Adjustments to Schedules V-IX should be provided only on a total company basis. With the exception of Schedule X relating to weather adjustments, the schedules included in the report should not include the proposed adjustments. Printed schedules reflecting the proposed adjustments may be included as a supplemental attachment to the Earnings Report.

Schedule XII: Extraordinary and Nonrecurring Items

This schedule details all extraordinary and nonrecurring items included in the numbers reported on other schedules of the earnings monitoring report that equal or exceed one percent (1%) of total expenses as reported on line 21 of Schedule I. For purposes of this schedule, extraordinary and nonrecurring items are those items that are not incurred in the regular course of the TDSP's business, or items that would have an abnormal effect on the revenues and/or expenses of the reporting period. Section A should detail all such items for the reporting period. Section B should detail all such items and/or events that the TDSP is aware of that will have an impact on the twelve months immediately following the reporting period.

Supplemental Schedule I-1: Amortization Expense

Enter the Total Company, the Total Electric, and the Texas Jurisdictional amount for all items being amortized on Schedule I, Line 12.

Please list each item individually.

Include pre-September 1999 long-term debt and preferred stock transaction costs if they are being amortized as a cost-of-service item per the final order in the company's unbundled cost-of-service docket. The reported amount should also include any allowed return granted in the company's unbundled cost-of-service docket and not included as an addition to rate base. Post-September 1999 long-term debt and preferred stock transaction costs should be included in Schedule VIa and VIIa.

Please do not include interest expense on long-term debt on this schedule.

Supplemental Schedule I-2: Other Expenses

Enter the Total Company, the Total Electric, and the Texas Jurisdictional amount for all other expense items not otherwise provided for on Schedule I.

Please list each item individually.

Please do not include interest expense on long-term debt on this schedule.

Supplemental Schedule II-1: Summary of Substantive Rules 25.77 Expenditures

Please provide a summary of the information required under Substantive Rules 25.77 for the monitoring period.

Supplemental Schedule III-1: Other Invested Capital Additions

Enter the Total Company, the Total Electric, and the Texas Jurisdictional amount for all other additions to invested capital not provided for elsewhere on Schedule III.

Please list each item individually.

Supplemental Schedule III-2: Other Invested Capital Deductions

Enter the Total Company, the Total Electric, and the Texas Jurisdictional amount for all other deductions to invested capital not provided for elsewhere on Schedule III.

Please list each item individually.

Supplemental Schedule IV: Comments/Footnotes

This schedule is to be used for providing comments or footnotes pertaining to other schedules in the report. Please provide the first page of this schedule even if there are no comments or footnotes. (Mark n/a if not completing this schedule).

Supplemental Schedule V: Discounted Rate Classes

This schedule provides detail on customers paying rates at discounted levels. Please see the instructions included on the schedule.
